Ebenezer Ojeba

100001

With over 3 years of experience, I'm a dedicated software developer with strong full-stack skills, specializing in creating user-focused, visually appealing, and high-performance web applications. I have a proven track record of building robust projects, ranging from e-commerce platforms and event planning websites to service-based applications, using technologies like React, Node.js, MongoDB, and TypeScript.

Work Experience

FullStack Developer

AEO Solicitors-Yaba

February 2024 to Present

As a Full Stack Developer at AEO Solicitors, I played a pivotal role in designing and delivering scalable web solutions that streamlined internal processes and enhanced client interactions. I built responsive user interfaces using React, developed secure backend systems with Node.js and Express, and implemented seamless database integrations with MongoDB. By collaborating with cross-functional teams, I ensured the delivery of user-centric applications tailored to the firm's needs.

Frontend Developer

Upwork-California

June 2023 to January 2024

The role from Upwork came as freelancer where I provided solutions for clients across various industries. I worked closely with clients to understand their unique needs, creating responsive, user-friendly interfaces and efficient backend systems. My projects focused on building high-performance application. With a commitment to meeting deadlines and exceeding expectations, I earned positive feedback and built lasting professional relationships.

Freelance Software Developer

Fiverr-Isreal

November 2022 to May 2023

As a Freelancer on Fiverr, I provided end-to-end web development solutions for clients across various industries. I designed and developed responsive websites, created user interfaces, and built robust backend systems using technologies like Node.js, and also for database, MongoDB. My role involved collaborating with clients to understand their requirements, delivering customized solutions, and ensuring high-quality and secure applications

Junior Frontend Developer

Ajayi Technical Company LTD-Gbagada

March 2022 to October 2022

This role honed my technical skills and teamwork abilities while providing valuable insights into the software development lifecycle. As a Junior Developer at Ajayi Technical Company Ltd, I contributed to the development and maintenance of web applications, focusing on creating responsive designs and optimizing application performance. I collaborated with senior developers to debug and enhance code, achieving a 20% improvement in efficiency.
